Navapur Road, Boisar, Dist- Palghar, Maharashtra-401506.

## Handling and Storage of Tin Plate / Tin free Steel

Packing and storage area must be cleaned regularly in order to avoid accumulation of dust and debris.

### Use Hand Sanitizer

Always clean your hands and use a hand sanitizer before handling tin plate/Tin free product. Also, use clean dry hand gloves to protect the surface of the sheet.

Storage and packing area should be free from any form of water contact. In case of presence of water, the sheets must be separated, cleaned and completely dried before using.

Do not let sheets slide on each other or any other rough surface.

Do not over stack the packets/Coils. The packets must not be stacked over a 6 layer level and the coils must not be stacked over a 3 layer level.

Once the packets/coils are opened, they must be used immediately and should not be held open for a long time without processing.

Material must be stored indoor on the wooden blocks as supplied. The storage area must not be humid.

### Do's

1. Storage yard should be properly covered.
2. Material should be kept in clean, dry, shaded, good ventilated and plain surface condition.
